

# Managing the security of your network, together

Managing your firewall is an integral part of maintaining your network's security and helping improve staff productivity.

Intraspac offer a cutting edge firewall management system that takes away the hassle of managing and maintaining your firewall – giving you the tools you need to manage and get on with business.

**Network protection that comes with peace of mind – and full UK-based support**

The Internet is critical to your business, but you don't want to spend valuable time dealing with firewall issues. This is where Intraspac come in.

Because you're looking for a one-stop-shop for Internet technologies, you can rely on Intraspac to provide you with 24/7 uptime – and, should the worst happen you can count on the support of our experienced and friendly UK-based technicians.

As specialists in this area, we have the resources to properly implement the technology – leaving you to focus on the day-to-day challenges and opportunities.

**Call us today – and let us take firewall management off your hands**

To find out more about our firewall management system or to discuss your requirements, just call us on 0845 3886893.
